

SeaWind Student BYOD Policy

As we increase digital learning opportunities for students we want to ensure that mobile devices are used appropriately. Students at SeaWind will follow these rules that have been added to the District Guidelines.

1. Parent agreement form must be signed before any student may use a mobile device at school.
2. Mobile devices may be used only for teacher directed instructional activities.
3. All mobile devices used on school campus will be no smaller than 7".
4. No recording of voice, video or still photography may be taken of anyone on campus without prior written consent recorded on SeaWind's form along with a district photo release form.
5. When sharing devices, the owner will be the only one to handle the device.
6. Students may use the Martin County School District Wifi only. No outside network may be used.

It is understood that teachers may add further restrictions on the use of mobile devices to improve classroom management. Those additions will be communicated to parents.
